
Lab4: Aeroplane Game

Background image is a cloud image which moves in an infinite loop. **background-repeat: repeat-x;** is used to repeat the image horizontally in a loop. Then an aero plane image is added in the page. All the movement of objects is done using basic CSS animation. The plane moves vertically up and down on button click using JS. On single click the plane start propagating until it reaches the boundary. There is a stop button to stop the animation at any time you want. There are different object or obstacles which moves randomly in the canvas.
